Quick Start • one page • everything you need to begin

The one thing to remember

You never have to change any setting. A good choice is always made for you. Just type what you want, in plain words. That is the whole app.

Getting around

At the bottom of the screen is a small round handle, the **compass**. **Press it** to see a button for every screen (Chat, Image Maker, App Builder). Tap one to go there. Lost? Press the compass.

Try these three

1. Ask a question

Type your question in the box at the bottom and press send. That is it.

2. Make a picture

Press the compass and choose Image Maker.

Type what you want, for example: a bulldog wearing a hard hat.

Press the big Ignite the Forge button under the box. Your picture appears on the right.

3. Build an app

Press the compass and choose App Builder.

Pick Beginner. Say what you want, in plain words.

It asks you a few questions, then say 'build it' and it goes to work.

Four rules that make it safe

- You never have to change a setting. The defaults are already good.
- Lost? Press the compass. It lists every screen.
- It always asks before it spends any money.
- Your pictures and chats belong to you.

Want the details? A full manual walks through every button, screen by screen.
